

# Electronic Earmuffs

Protect your hearing from sudden loud noises.

Suitable for indoor and outdoor power and construction equipment.

## Instructions

Turn on the switch and adjust the volume with the knob so that you can hear normal conversation.

Don't set the volume too high or you may block out sounds you wish to hear.

The unit will stop transmission to the speaker before sounds of 85DB or higher reach the ear.

As soon as the sound level drops under 85DB, it will return to normal.

Operation range: -6°C to + 40°C temperature  
0% to 98% humidity

## How to Install Batteries (two AA batteries not included)

**Step One**  
Use a coin to pry the ear cushion.

**Step Two**  
Remove the ear cushion and sponge.

**Step Three**  
Insert batteries. Make sure the + and - are correctly aligned.
