HANDY TIPS FOR THE PERFECT JOB

- Dry with a heat gun or lamp to save drying time.
- Different depths and timbers have different drying times. •
- Just wash hands or tools with water to clean up. •
- Use on metal, plastic, fibreglass and in foundries. •
- Mix in colour prior to applying or apply stain when dry.
- Final colour after coating will be as you see when wet. .
- TIMBERMATE is ready to sand when colour fades, does not blind sandpaper or sands off like baby powder
- In cold weather, if **TIMBERMATE** hardens, place in sun • or stand in tub of hot water to soften.
- Thinning with a little hot water provides best results. •
- To fill larger holes, fill in layers of 6mm at time, allowing drying between each layer.
- Use a plastic spatula for best results.

Colours shown are a guide only.

KEEP WAXSTIX ON HAND

TIMBERMATE carry a wide range of coloured wax sticks to repair scratches on timber surfaces. Keep selected colours on hand to keep your timber looking like new.

No beeswax! Which means this synthetic wax will accept coatings.

COMPARE THE DIFFERENCE!

	TIMBERMATE	OTHER TIMBER FILLERS		
WATER BASED	TIMBERMATE's secret ingredient is TAP WATER and contains NO acrylic, NO latex or harmful ingredients.	Contain either latex or acrylic.		
MANY PRODUCTS IN ONE	TIMBERMATE is a: Wood Putty, Grain Filler, Edge Filler, Crack Filler and a Sanding Sealer all in one!	Require you to buy additional products for different jobs.		
NO WASTE - INDEFINITE SHELF LIFE	If TIMBERMATE dries out or gets hard, just add a few drops of warm water and soften.	Have to be discarded when they dry out.		
won't shrink, sink, crack or fall out	TIMBERMATE is manufactured to a unique formula to give a great result, not just immediately, but for years to come.	Often disappoint, particularly over time.		
DRYING TIME: 60 SECONDS TO 30 MINUTES	Because TIMBERMATE is non-flammable, it can be force dried with a heat gun. Depth of fill determines drying time.	Have to dry over time, often holdin up the job.		
sands easily and dust is re-usable	TIMBERMATE is easily sanded and the dust can be collected and reused by simply adding water.	Not possible with acrylic or latex based products.		
ACCEPTS ALL STAINS, COATS AND COLOURS	TIMBERMATE is compatible with all types of stains including water, oil or spirit plus paint and vegetable colours. Takes on the exact colour. Accepts all top coats - acid catalysed lacquers, epoxies, water based paints and polyurethane. Add stain to putty or apply when putty is dry. Wet colour is same as finished colour.	Many restrictions with colouring agents and products never exact as they dry differently.		
Comes in cost-saving Tubs, not tubes	If you take too much putty out of a TIMBERMATE tub, just put it back for use next time.	You can't put any unused putty back into a tube which means wastage.		
WON'T BLIND THE GRAIN	TIMBERMATE fills and seals but will not blind the grain.	Hard to sand and covers the grain.		
BIG, BIG SAVINGS	Compare the price of our TIMBERMATE range of tub sizes. Giving you best value per stain.	Most tube grades are MUCH MORI expensive, can't be reconstituted with water and are only sold in sma packs.		
HOT & COLD USE	TIMBERMATE won't burn and if the tub freezes, it can be thawed. Freeze-thaw stable.	Will burn and cannot be reconstituted.		
COLOUR RANGE	15 colours to choose from to give you an excellent match.	Usually a poor range of colours.		
TIME TESTED	The TIMBERMATE has been selling for over 50 years - your assurance of time-tested quality.	Most are an unknown quantity over long period of time.

SO EASY WITH TIMBERMATE

FILLING KNOT/NAIL HOLES

TROWEL FILLING

I. MIX:

GRAIN FILLING

I. APPLY:

Using a plastic or high quality stainless steel putty knife, apply TIMBERMATE directly out of the tub prior to sanding or first coat. (NOTE: If filler turns black, the putty knife is not

high content stainless steel; however, the black will sand off.)

Match the color to the wood. Mix TIMBERMATE in the tub with warm water (a mixer attached to a heavy duty drill is ideal). Slowly pour the water in as you mix – usually about

15% water by weight. Mix until TIMBERMATE has the consistency of toothpaste.

I. MIX:

Match the color to the timber. Mix TIMBERMATE in the tub with warm water (a mixer attached to a heavy duty drill is ideal). Slowly pour the water in as you mix – TIMBERMATE

should have the consistency of thick paint. Allow TIMBERMATE mixture to dry to the consistency of toothpaste before sealing tub.

2. FILL: If hole is greater than 6mm, fill by layering TIMBERMATE in 6mm increments.

2. APPLY: Apply TIMBERMATE, with a plastic trowel, or rubber float across the grain over the entire timber. Make sure the filler is forced into deep voids. Do not apply TIMBERMATE too heavily –

a small amount goes a long way. Remove all excess TIMBERMATE. (Return excess to the TIMBERMATE container - no waste.)

2. APPLY:

Apply TIMBERMATE to the timber and squeegee it or rub across the grain over the entire job. Do not apply TIMBERMATE too heavily – a small amount goes a long way.

Remove all excess TIMBERMATE (return excess to the TIMBERMATE container - no waste).

3. DRY:

Let TIMBERMATE dry thoroughly or use heat gun or similar to speed drying. TIMBERMATE is properly dry if it sands to the consistency of baby powder.) Drying time depends on depth of fill.

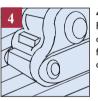

3. DRY: Let TIMBERMATE dry thoroughly or use heat gun or similar to speed drying. TIMBERMATE is properly dry if it sands to the consistency of baby powder.) Drying time depends on depth of fill.

3. DRY: Let TIMBERMATE dry thoroughly or use heat gun or similar to speed drying. TIMBERMATE is properly dry if it sands to the consistency of baby powder.) Drying time depends on depth of fill.

4. SAND:

Final sand and remove all dust and debris. (NOTE: Do not use a grit coarser than 120.)

4. SAND: Final sand and remove all dust and debris. (If grain filling do not use a grit coarser than 120.)

4. SAND:

5. STAIN:

Final hard plate or screen and remove all dust and debris. (NOTE: Do not use a grit coarser than 120.)
